Lear Siegler Services, Inc.

To Whom It May Concern

This letter is to validate the use of the Medical Clinic (Ark-La-Tex) 1414 Arkansas Blvd, Texarkana, AR 71854.

We are a contract company here in New Boston, working on various types of military vehicles, and equipment. This is a difficult job requiring our employee's attention at completing their jobs. Because of this, our employees are always in danger of getting hurt and attention to completing their jobs is a requirement.

In 2005, the Lear Siegler Services Mobility Center was suffering from a (40) OSHA incident rate, with a rate this high we were in danger of losing several contracts. Most of the injuries were because we did not have a medical clinic that was willing to work with us to help lower our injury rate. In 2006 we dropped or injury rate down to (4.19) and this year we are at (.84). Our decrease in injury rate was because we switched medical clinics and now have a working relationship with Ark-La-Tex. We have over 500 employees and because of Ark-La-Tex our employees are being taken care of and our incident rate continue to drop.

Dr. Raker has worked closely with our safety department to ensure that (1.) Our employees are taken care of and (2.) Our incident rate for New Boston Mobility Center continues to be ranked as one of the lowest rates in our company, because of Ark-La-Tex Medical Clinic.
